Projects

Zoorya

Sep 2024 - Nov 2024 / 2 months

Freelance Project: Multi-City E-Commerce Platform

Developed a comprehensive e-commerce platform for purchasing animal products such as food and toys from various cities. The system featured an admin dashboard, where each admin was responsible for managing orders and products across multiple cities, while a super admin oversaw admins and their respective cities.

Broker

Jul 2024 - Sep 2024 / 2 months

Freelance Project: Distribution Process Management System

Designed and developed a comprehensive web application to streamline distribution operations for multiple companies and their clients. The system effectively manages salesmen's schedules, maintains detailed archives for both companies and clients. Integrated an intuitive admin dashboard, allowing for seamless management of companies and users.

- Technologies Used: Laravel-PHP, MySQL

Lumos

Apr 2024 - Jul 2024 / 3 months

University Project: Educational Platform

Dynamic educational platform designed to facilitate course delivery by professors and foster student engagement. The platform features a dedicated Q&A community where students can collaborate and seek help, alongside a powerful dashboard for professors to create and manage courses.

- Technologies Used: Laravel-PHP, MySQL, Filament, Stripe
- [Video Presentation](#)

OffYaba

Mar 2024 - Apr 2024 / 1 month

Freelance Project: Discount Card Application for Retail

Enabling users to easily obtain and redeem discount cards at participating stores and restaurants using QR codes. Integrated GPS functionality to allow users to discover nearby locations offering discounts.

- Technologies Used: Laravel-PHP, MySQL
- [Google Play Link](#)

M2MSeeding

A custom Laravel package for seeding fake data for M2M relationships.
