Ziad Bani Almargih
Backend Developer

Damascus, Syria | ziadbanialmargih@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Summary

Backend Developer specializing in Laravel and .NET with hands-on experience designing and scaling financial platforms and enterprise web applications. Skilled in building secure APIs, architecting microservices, and integrating with banks and external services to deliver reliable, high-impact solutions.

Experience

ShamLogix | Backend Team Lead

Feb 2025 - Present

• Led backend team: organized tasks, reviewed code, ran meetings, ensured delivery quality.
• Designed and implemented microservices for financial systems serving millions of users.
• Built integrations with banks, billers, and exchanges with hybrid encryption and queue-based handling.
Technologies: .NET, PostgreSQL, Microservices, Banking

Globe Technology Providers | Backend Developer

Nov 2024 - Jan 2025

• Contributed to ERP backend system using Java and Oracle.
• Developed and enhanced a pre-existing ORM to improve database interactions.
• Adapted quickly to Java development to integrate with team workflow.
Technologies: Java, Oracle

Code Shield | Backend Developer

Jun 2024 - Nov 2024

• Developed and maintained backend functionalities of web applications using Laravel and PHP.
• Collaborated with frontend developers to integrate APIs for seamless user experiences.
Technologies: Laravel, PHP, MySQL

Projects

Syrian Development Fund | *Fundraising and Donations Platform*

A fundraising platform integrated with banks, ShamCash, MTN, Stripe, and PayPal. Provides donation statistics and an admin dashboard to manage pledges, transfers, and donations. Supports 5 languages.

ShamCash | *Financial Services Platform*

Built integrations with banks, billers, and exchanges. Implemented hybrid encryption, microservices for 2M+ users, queue techniques for timeouts, and robust APIs.

MK-Academy | *Educational Mobile Application*

App for exam prep and lectures (9th grade and Baccalaureate). Integrated with YouTube and Bunny.net. Includes course subscriptions with coupon discounts and an admin dashboard.

Islamic CT | *Hajj and Umrah Booking Platform*

Platform for managing Hajj and Umrah trips with user trip booking, hotel/destination info, and an admin dashboard for management.

Zoorya | *Multi-City E-Commerce Platform*

E-commerce platform for animal products with an admin dashboard for multiple cities, managed by admins and super admins.

Lumos | *Educational Platform (University Project)*

Dynamic learning platform with professor dashboards, course creation, and student Q&A. Integrated payments with Stripe.

OffYaba | *Discount Card Application*

Mobile app for QR-based discount cards at stores/restaurants. Includes GPS-based nearby offers and an admin dashboard.
